

dermal fillers

Want to give yourself a younger fresher look without the risks of surgery?

We stock an extensive range of dermal fillers such as Restylane, Hydracell, Belotero, Teosyal, Radieese and Evolence. **We are able to smooth out lines, wrinkles and folds, add definition to the lips and cheeks and contour the face.** Smokers lines can be reduced to prevent lipstick bleeding, we can lift brows slightly, and reduce the jowl appearance of chins. All our products are slowly broken down by the body and are of low risk. Depending on the products selected a visit 1 to 3 times a year is needed to maintain your results.

thread vein treatment

With a combination of simple treatments we can now successfully **reduce and even remove unwanted thread (spider) veins** from the legs and face.

A series of small injections is often used (known as sclerotherapy) which causes the veins to slowly break down and fade 2-8 weeks after treatment.

Sometimes a course of treatments is needed depending on the required result.

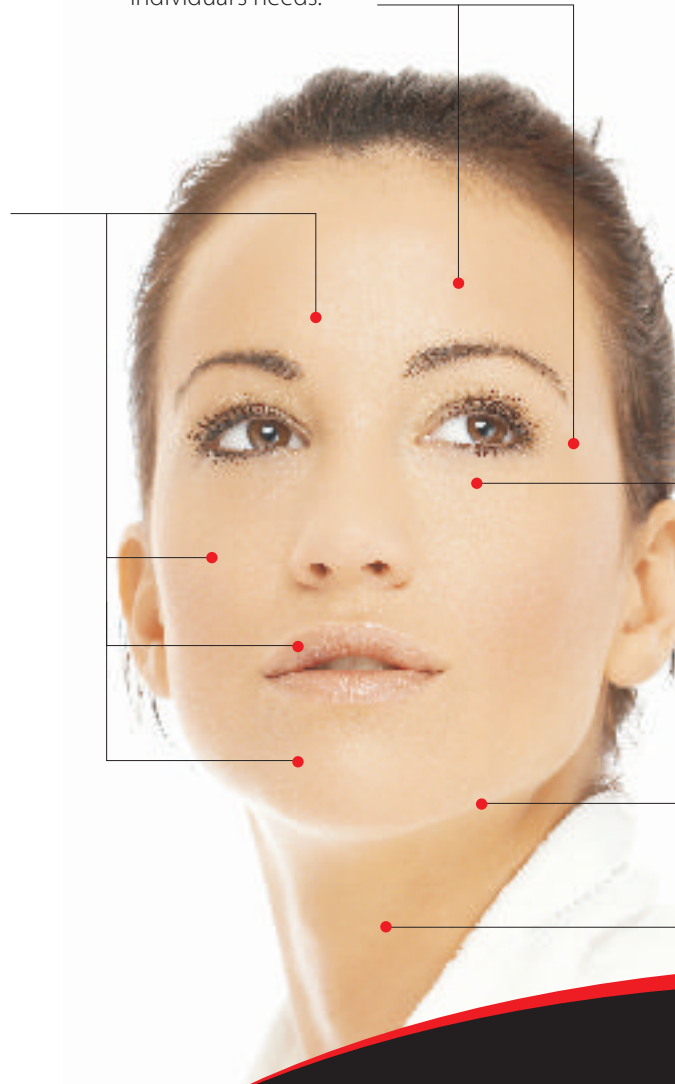

minor surgery

Dr Johnson can also perform some minor surgical treatments such as wart, milia, spider naevi, and skin tag removal. For more information call 01606 838 258

relaxing wrinkles

Our most popular treatment with men and women.

Used mostly to **reduce frown and forehead lines** and to **soften crows feet**. Within 2 weeks of this simple treatment your lines will soften leaving your face looking fresher, youthful and often less stressed. We aim to maintain some facial expression but treatments are tailored to suit the individual's needs.

mesotherapy

Mesotherapy is the micro injection of vitamins, homeopathic medications and traditional medications into the mesoderm (the middle layer of the skin).

It can be used to treat cellulite (legs and buttocks), localised fat areas such as eye bags, jowels, turkey necks, love handles, protruding tummies, and even lipomas.

Mesotherapy can also be used to **rejuvenate and plump out aging skin** on the face, hands and cleavage area.

A course of 3 to 10 treatments is needed depending on the type of treatment required and the problem area.

coming soon... Microdermabrasion and radio frequency skin tightening. Call us for more information.

skin rejuvenation

MC Treatments now stocks a variety of skincare products which we have specially selected to suit most skin problems. We stock Skinceuticals, Jan Marini, Agera, Dermaceutic and Medik8 to name a few.

We also provide a variety of chemical peels. Some can freshen up your face without any obvious peeling, others **help acne and reduce pigmentation** while other stronger peels **reduce the appearance of aging and scarring** but have a bigger down time due to the peeling effect.

Why not arrange a consultation where Dr Johnson can recommend the most appropriate treatments for you.

Dr Teresa Johnson

Dr Teresa (Teri) Johnson is a local General Practitioner in Middlewich where she has been a partner at The Oaklands Medical Centre for 8 years.

Teri qualified to be a doctor in 1993 after graduating from Liverpool University with an MBChB and has since worked and trained in the North West, obtaining her Vocational Training Certificate for General Practice in 1999. She has worked as a GP in Cheshire ever since.

She is a member of the GMC and the British Association of Cosmetic Doctors where she carried out her initial training in the use of Botulinum Toxin and Dermal fillers.
